

Chapter 7: Beware Neo- Feudalism

DOUBLE-CROSS
LOVE-BOMB

"Do not rich men oppress you?"
James 2:6.

Wall Street financed Hitler during WWII

REFERENCE: *Trading with the Enemy*, Higham, Delacorte Press

"...under the Freedom of Information Act... American businessmen... dealt with the Nazis right through WWII... Standard Oil... Chase Bank... ITT, Ford... helping them... were... government officials..."

"The bank [the Bank of International Settlements in Switzerland]... was Nazi controlled but presided over by an American, even in 1944... Standard Oil... shipped Nazis oil... Ford... trucks were built for Nazi troops... ITT supplied much of Hitler's communications..."

"Business as usual"

Money without morals. War is good for the economy...

Slave trade:

3-4 million died...

REFERENCE: *Star Tribune*, 5-4-94

“...a debate over the Jewish role in the slave trade that the Nation of Islam has made the centerpiece of its historic case against the Jews... the key document has been the Nation's book, *The Secret Relationship Between Blacks and Jews*, which details the Jewish involvement in slave-owning and slave trading.

“...the academic consensus is that some 10 million to 11 million Africans were brought across the Atlantic as slaves between the 16th and 19th centuries, and... another 3 million to 4 million died... about 600,000 to 650,000 were brought to the United States.”

However, low wage slavery continues

- The slave trade started in ancient times, then spread to Greeks and Romans, Middle Ages British, Spanish, Jews, Arabs, and blacks themselves, and the rip-off attitude continues...
- In the 1700's, British bankers and investors wanted international free trade, which they controlled, combined with cheap labor, including slave labor, and the American Revolution was a result, in rebellion against cheap wages...
- Since the Immigration Law of 1965, British bankers and investors and their allies have been flooding the USA with cheap foreign labor, again pushing international free trade and cheap labor, and attacking nationalism and the middle class...

"Coercive utopias" kill 200,000,000 in 1900's

REFERENCE: *The World & I*, August 1993. Book review: *Out of Control*, Brzezinski, and *Lethal Politics*, Rummel.

"...this century's unprecedented bloodletting... totalitarian attempts to create coercive utopias... Thirty-three million soldiers have been killed...

"Hitler's infamy was eclipsed by that of Stalin and Mao... In the Soviet Union... about sixty-two million... were murdered by the government... Mao Zedong... ordered the deaths of 38.7 million -- Chinese, Tibetans, and other minorities...

"...approximately two hundred million human beings were destroyed by wars and totalitarian genocide in the twentieth century."

Big government = tyranny & genocide

British neo-feudalism

It's no secret. They rather openly admit it in their newspapers. The British upper classes admire the extremes of wealth and poverty in the early Middle Ages.

BRITISH INFLUENCE IN THE USA:

- **Investment:** The British are the biggest investors in the USA.
- **Federal Reserve:** The British allegedly control the US Federal Reserve. (It is private and listed in the non-government section of the phone book.)
- **Clinton appointees:** Included many Rhodes Scholar graduates of Oxford University, a center of imperialistic British world view...

BRITISH POLICIES:

- **"Balance of powers"**, so innocent sounding, it means go to war against the next biggest rival to your power. (This policy has led to the Civil War, WW I, WW II and communism, financed on all sides by the British...)
- **"Money out of thin air"**, the use of central banks to control the world money system, and thereby they hope, control the world itself...
- **Drug legalization**, managing the drug trade and laundering drug money...
- **Promotion of free sex**, in music, TV, schools. (Drug using, amoral people are less of a threat to the British upper classes.)
- **"Dumbing down" the education system** for commoners. (British high schools operate at a low level, with graduates often not knowing simple arithmetic. They are trying similar "education reform" in the USA.)
- **"Free trade," low wages, de-industrialization**, with high rates of immigration, to lower wages, and play "divide and conquer".
- **One world government**, which they believe they can control.
- **The destruction of all nationalism**, which they believe interferes with their dominance of society.
- **The destruction of marriage**, family, home ownership and family farms, all of which provide a power base for average citizens.
- **Smash the middle class!** How dare they step out of their place at the bottom...

**It's impossible to
please an alcoholic**

"British... drug money laundering machine"

REFERENCE: *Executive Intelligence Review*, 7-26-96, LaRouche

The illegal economy equals one trillion per year, half of it in laundered drug money.

"...laundering of at least \$84 million... into Swiss and London bank accounts... approval of... Citibank, as well as the U.S. Federal Reserve..."

"... the 'extended British Commonwealth... not only runs this criminal money laundering today, but has run it for two centuries, going back to the British Opium Wars against China...'

"It is the biggest private cash flow in the world. *For this reason, the banks are more addicted to this narco-money stream than is the heroin junkie to his fix.* The banks could not give up this money without collapsing... The British will do everything to protect the narco-money-laundering trade..."

"... in the Nov. 15, 1995 *London Times*, 'Last year (1994), \$400 billion of illegal drug money was laundered in America...'"

The world's biggest banks are involved

Money out of nothing

REFERENCE: *Tragedy and Hope*, Quigley (a mentor of President Bill Clinton), 1966

"...bankers were creating money out of nothing. The same thing could be done in another way... by deposit banks... Such created deposits also were a creation of money out of nothing... William Paterson... on obtaining the charter of the Bank of England in 1694, to use the moneys he had won in privateering, said, "The Bank hath benefit of interest on all moneys which it creates out of nothing." This... is, of course, generally admitted today.

"This organizational structure for creating means of payment out of nothing, which we call credit, was not invented by England but was developed by her to become one of her chief weapons..."

Banking = a weapon

Wall Street: investing in your future...

REFERENCE: *Business Week*, 11-1-1999

"IS THE U.S. BUILDING A DEBT BOMB?

"...the debt load on the U.S. economy is bigger than it has ever been.

"Without much warning, a mild downturn can turn into a surge of defaults...

" 'Corporate debt has also spiked... 'This is historically unprecedented... We're in territory where no one knows what will happen.'

" 'History tells us that sharp reversals in confidence occur abruptly, most often with little advance notice... into a very short period.

"Despite the huge gains in the stock market, there is a pronounced tilt in corporate financing toward debt and away from equity... companies are buying back far more stock than they are issuing.

"With aggressive buyback programs... across the whole market, the question is whether stock prices would fall if the buybacks slowed or ceased.

" 'We're in a dangerous situation' ..."

...with a debt bomb

"Free Markets Disrupt Latin America"

REFERENCE: Lakeland Ledger, 8-6-2002.

"A recent U.N. report flies in the face of Washington's mantra that free markets are the only path to economic growth... "

"The application of free-market nostrums throughout the developing world has actually aggravated poverty. It has led to declining standards of living and widening income disparities.

"Today, 211 million out of Latin America's population of 510 million live in poverty, with 86 million too poor to purchase even the most basic necessities... increasing levels of poverty, crime, corruption, drug trafficking and addiction.

"Argentina's economic implosion...

"And in Columbia, a 38-year-old civil war pitting Marxist guerrillas against right-wing paramilitaries...

"... millions... have found out the hard way that Washington's strategy has been too narrowly focused on free markets."

Free trade = swindle.

National economies work.

"Traffic Crashes"

REFERENCE: *American Scientist*, May-June 2002

(An example of how lawyer-politicians rip-off the citizens.)

"Drunk driving is a major safety problem, accounting for as much as half of all traffic fatalities.

"Belt use reduces a driver's risk of death in a crash by 42 percent.

"Traffic crashes are a source of vast riches to the legal industry in this country. The legal system also happens to drive the political process in the United States. In other countries, legislators come from varied backgrounds, but in the United States, the political structure is dominated by lawyers.

"The American focus on air bags... were mandated by a lawyer-led safety agency that claimed safety benefits far in excess of published technical estimates and ignored technical information documenting their harmful effects... Now, the United States is the only country in the world in which it is illegal to purchase a new car without a device that is known to increase the net harm to women... and to increase fatality in children...

"On average, airbags increase the fatality risk to belted children by 31 percent and to unbelted children by 84 percent...

"... there is so little time for an airbag to inflate that it must inflate at a speed high enough to injure anyone who happens to be in the deployment space... Effective occupant protection requires that the occupant be restrained *before* the crash...

"Nations with safer records than the United States have stricter alcohol laws, which they enforce more stringently; higher belt-wearing rates; and many driver-focused policies.

"... Canada, Britain, Australia and Sweden, have reduced their annual fatalities to less than half of their peak values. (U.S. fatalities are still within 24 percent of their all time high.)

"...the cost of the airbags on U.S. roads exceeds the gross national product of many countries."

"Traffic crashes are a source of vast riches to the legal industry..."

"Unmade in America"

REFERENCE: *HARPER'S MAGAZINE*, June 2002

"...when a whole generation of corporations prove prodigal?"

"Like Enron, our manufacturers... will probably get to watch one day as their empty edifices collapse... The global assembly lines that... Dell, Ford, Motorola, and Intel have... engineered... are just as... complicated as any of Enron's financial schemes.

"Unfortunately... the growing reliance by entire industries on single source of supply - violates one of the most basic rules of manufacturing, which is always to have an alternative at the ready.

"Dell... is really little more than 'a delivery channel for Taiwanese-made products."

"...there has been no coherent mainstream discussion about whether this scattering leaves the global industrial system - and by extension the entire global economy - more liable to catastrophic shutdowns.

"...evidence began to mount that these grand reforms would never deliver all the promised economic benefits.

"By the late Clinton years, globalization had come to mean simply that someone else would do the dirty work, someone far away. Our own industrial workers, once we emancipated them from the lines... could wait tables and drive FedEx vans.

"And here is America careening toward a similar economic integration with half the world amidst a near absence of debate..."

"Somehow, the inverse possibility - that economic interlinkage might make the United States dependent on China - was never considered... the greatest failure in the history of American geopolitical thought.

"...a global-manufacturing system created by companies such as Intel, which increasingly act independently of national considerations.

"...a time when economies were still largely national... when the idea of a large, vital corporation moving its center of gravity abroad was unthinkable.

"We have, it seems, outsourced one time too many.

"Our corporations have seemingly reduced the average individual "nation" to little more than a nasty knot of taxes, work rules, and other geographic idiosyncrasies to be unbound and intertwined with their neighbors..."

"At the end of the day, who "owns" the actual semiconductor plant matters far less than where the plant is located, because whoever physically controls the production of semiconductors can paralyze... the world's assembly lines..."

"...debated whether Lenin once said, 'A capitalist would sell rope to his own hangman.' Change 'rope' to 'supply chain,' and... it is still clearly true.

"...we may be lucky to eke out a few good years as the corporate front end, the marketing department, for China. Unless, of course, Beijing decides to vertically integrate that activity too."

"A near absence of debate"

World-wide population Explosion, immigration invasion of the USA...

THE WORLD POPULATION IS GROWING BY 90 MILLION PER YEAR:

That's the equivalent of New York City every 30 days. The world environment, resources, and economy cannot handle such numbers.

NEARY ALL OF THEM WANT TO COME TO THE U.S.A.: And we can't handle them either. We no longer have a frontier, and with tens of millions unemployed, immigration only drives down wages and bankrupts social services. Instead, we need to make things better in the various home countries.

THE WALL STREET- COMMUNIST- BANKING COALITION WANTS OPEN IMMIGRATION TO THE U.S.A.:

It's called "smash the middle class", "smash the family farmers around the world". *The Wall Street Journal*, the Ford Foundation, the "right wing" (anti-) Heritage Foundation, the "left wing" National Lawyers Guild, all want open borders, especially for third world immigration, where wages are cheapest. They will push until you push back.

THE CLASSIC BATTLE OF "CIVILIZATION", MONEY VERSUS BABIES:

When people are given the respect of education and land ownership, they tend to limit population growth to reasonable levels. The London - Wall Street - communist - banking -- bureaucratic conspiracy has no intention of doing either. Hence, there are billions of poor people, with billions more on the way, versus fewer and fewer rich people with ever increasing trillions of dollars. It's show down time.

DISTRACTIONS: While bankrupting farmers and workers, and making the USA wide open to drug runners and illegal immigrants, bankers bought off the educated golf players with an artificial stock market bubble. That bubble is now breaking, with an eight trillion dollar loss thru 2002, and another 10 trillion dollar loss or more thru 2009.

Money versus babies...

Money versus

Morals?

Let's say you have the opportunity to advise someone:

- **A pretty girl** can make \$7.00 per hour as a secretary. She can make \$1,000 a night in prostitution. How would you advise her?
- **Farmers** can make \$5.00 profit per tomato plant. For about the same amount of effort, if they don't get caught, they can make about \$1,000 per marijuana plant. How would you advise them?
- **A mega-banker** can make a billion dollar profit by building a city in the desert and help bring peace and prosperity to the world. For a similar investment, he can hire provocateurs on both sides, stir up a war, and make a trillion dollar profit. How would you advise him?
- **A factory owner** can make a million dollars by paying a living wage. If he moves the factory overseas with the help of the U.S. government, and pays less than slave labor wages, and dumps toxic waste without concern for the environment, he can make a billion dollar profit. How would you advise him?
- **Politicians** can be honest, and win or lose, promote the Constitution and the greatest good for the voters. Or, they can sell their vote to the highest bidder, and get a lot of money, and who knows what will happen to anyone else? War? Treason? Poverty? Who cares? How would you advise the politicians?
- **A British "aristocrat"** tells you everything he has of value has come from international free trade and low wages, and that if he paid a middle class wage, he would not have near as much money. How would you advise him?
- **A Wall Street investment banker** promises a 15 percent return on your money by renting your daughter out as a whore, sending your son out on a useless war, and dumping toxic waste in your environment. Has he got a deal?

Money plus morals.

Always.

Big money = “abusive power”

REFERENCE: *The Ultra Rich*, Vance Packard. From an advertisement for the book.

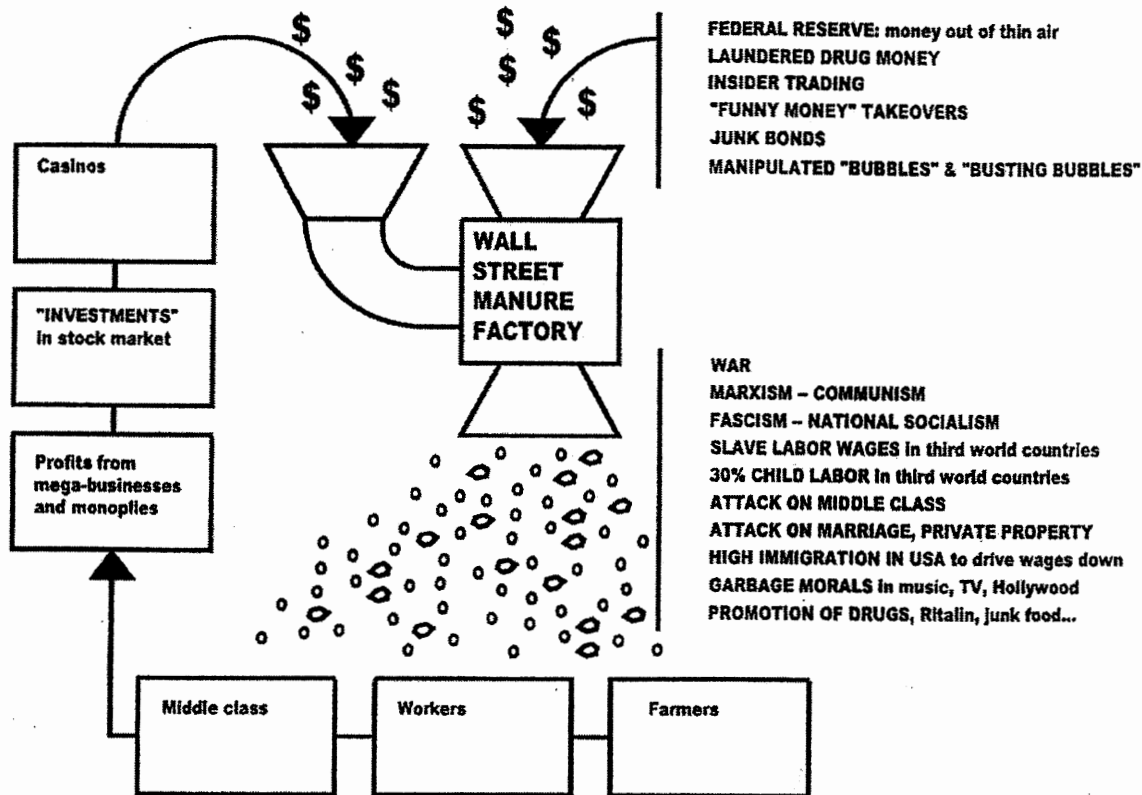

"Not since 1929 has so much of America's private wealth been concentrated in the hands of its richest families... as the rich grow richer, what happens to the rest of us, and our democratic ideals? The surprising, often disturbing answers... Packard interviewed 30 centi-millionaires... these surplus funds are used to wield power -- political, financial, and frequently abusive power."

If only I had a lot of money, I could do so much good

Question: Would you really be better than the rich, or become more like them?

Warning: Offensive poster, but not near as offensive as Wall Street.

Perpetual motion machine - almost

The middle class: investing in their future - destruction

Better yet, stay away from Wall Street.

World conquest: Is it scientifically possible?

HYPOTHESIS:

Power in society is nearly as balanced between leaders and followers as between north and south poles on a magnet, by laws-of-nature necessity.

COROLLARIES:

- **THE POWER MUST BALANCE:** Any true gain or loss of power by one pole will tend to increase or decrease the power of the other pole.
- **THE POWER MUST BALANCE:** It is impossible for one pole of a magnet to gain power by stealing power from the other pole of the same magnet.
- **THE POWER MUST BALANCE:** If leaders make the followers healthier, wealthier, and wiser, the leaders will also tend to prosper, and vice versa.
- **THE POWER MUST BALANCE:** It is better to be a moderate leader of a strong society than king of the winos.
- **THE POWER MUST BALANCE:** If leaders gain too much power and weaken the masses, then associates of the rich, military leaders, and secret police will challenge each others' power, weakening power for everybody.
- **THE POWER MUST BALANCE:** Many of the imbalances of economic and political power in human society are due to the influence of alcohol and drugs, which create havoc and unbalance everything.

Power is a balance.
